VOLUME CONTENTS

VOL. 36, NO. 1

1996

V. D. LISEIKIN	1 The construction of structured adaptive grids—a review
L. F. YUKHNO	33 An algorithm for computing the rank and signature of a Hermitian partitioned-tridiagonal matrix
A. I. KALININ, F. M. KIRILLOVA and O. I. KOSTYUKOVA	41 Optimization of systems with multidimensional controls according to criteria which are invariant under some of the control effects
E. N. GORDEYEV and V. K. LEONT'YEV	53 A general approach to investigating the stability of solutions of problems of discrete optimization
B. A. ISKENDEROV	59 The principles of radiation for elliptic equations of higher order in a cylindrical domain
R. R. GADYL'SHIN	75 The asymptotic form of solutions of singularly perturbed Dirichlet problems
R. V. KHACHATUROV	85 A computational method of investigating the self-focusing of X-rays in a plasma
A. V. SHCHEPROV	93 A numerical investigation of the recondensation of a mixture of rarefied gases in a spherically symmetrical force field
YE. I. VASIL'YEV	101 A <i>W</i> -modification of Godunov's method and its application to two-dimensional non-stationary flows of a dusty gas
P. A. KRUTITSKII	113 The second initial-boundary-value problem for the gravitational-gyroscopic wave equation
N. YA. MOISEYEV	125 Consistent approximation in Godunov-type difference schemes for one-dimensional problems of gas dynamics
T. I. SEREZHNIKOVA	127 An algorithm for constructing sections and rectangular grids in domains in a plane

VOL. 36, NO. 2

1996

Kh. D. IKRAMOV and V. N. CHUGUNOV	131 Normality condition for a complex Toeplitz matrix
L. V. CHONI and YU. I. CHONI	139 A modified minimum-residual algorithm
R. P. TARASOV	145 Digital spectral analysis in the algebra of formal polynomials and its application
G. I. SHISHKIN	165 Locally one-dimensional difference schemes for singularly perturbed parabolic equations
N. G. USHAKOV and A. A. FIRSOVA	181 A monotone regularization method for one class of non-linear integral equations
M. A. OL'SHANSKII	193 The Stokes problem with a parameter
A. A. AMOSOV and A. A. ZLOTNIK	203 Quasi-averaged equations of the one-dimensional motion of a viscous barotropic medium with rapidly oscillating data
Kh. B. ALLAKHVERDIYEV and YU. D. PLETNER	221 The two-dimensional gravitational-gyroscopic wave equation

A. V. KRAVTSOV and S. YA. SEKERZH-ZENKOVICH	229	Natural oscillations of a viscous, continuously stratified liquid in a closed vessel
V. I. KOPCHENOV and I. N. LASKIN	235	A finite-difference scheme for the numerical solution of parabolized Navier-Stokes equations
V. V. ARISTOV and I. G. MAMEDOVA	247	Parallel algorithms for solving the Boltzmann kinetic equation
I. V. SAVENKOV	255	Unsteady axisymmetric flow through tubes with elastic walls
A. T. KAS'KO, A. M. KROT and YE. B. MINERVINA	269	A fast algorithm for calculating the inverse convolution for signal and image reconstruction

VOL. 36, NO. 3

1996

KH. D. IKRAMOV	279	A canonical form for projectors under unitary similarity
K. A. LEBEDEV	283	A method of finding the initial approximation for Newton's method
A. M. SHLOMA	291	The solution of operator equations with incomplete information
I. P. MYSOVSKIKH	303	A representation of the reproducing kernel of a sphere
F. P. VASIL'YEV, A. NEDICH and M. YACHIMOVICH	309	A regularized continuous linearization method for minimization problems with inaccurate initial data
P. N. VABISHCHEVICH	317	Vector additive difference schemes for first-order evolutionary equations
A. P. MIKHAILOV, V. V. STEPANOVA and A. A. SHAMRAI	323	The existence and properties of self-similar solutions of the Cauchy problem for the equations of gas dynamics
V. V. GUDKOV	335	The explicit form of wave solutions of the evolutionary equations
G. I. SHISHKIN	341	The grid approximation of parabolic equations with singular initial conditions
V. M. BELOV, N. S. DOZORTSEVA, T. A. RYBAL'CHENKO and V. A. SUKHANOV	357	A two-stage version of a scheme for solving the two-dimensional heat conduction equation with rapidly changing coefficients
YU. N. SUBBOTIN	365	Near-orthogonalization in the finite element method
M. P. GALANIN	373	An estimate of the spectral boundaries of a difference operator for problems of quasistationary electrodynamics
A. V. RODIONOV	379	A numerical method for solving Euler's equations which retains the approximation on a deformed net
S. P. POPOV	391	A modification of the Shasta gas-dynamic scheme
N. V. POGORELOV and A. YU. SEMENOV	395	A modification of the non-reflecting boundary conditions for gas-dynamic simulation in astrophysics
M. N. VYALYI, E. N. GORDEYEV and S. P. TARASOV	405	The stability of the Voronoi diagram
YU. A. KRIKSIN	415	Solutions of the system of Hamilton difference equations with external action

VOL. 36, NO. 4

1996

A. S. POPOV	417	Cubature formulae of high orders of accuracy for a sphere which are invariant with respect to the tetrahedral group
A. F. IZMAILOV	423	Lagrange methods for finding degenerate solutions of conditional extremum problems
A. S. ANTIPIN, A. NEDICH and M. YACHIMOVICH	431	A two-step linearization method for minimization problems

V. I. PINCHUKOV	439	Flow correction in multidimensional problems of hyperbolic and parabolic type
V. S. RYABEN'KII	451	Potentials for general linear systems of difference equations on abstract grids
S. L. DEGTYAREV	457	The stability of locally implicit difference schemes for the two-dimensional heat-conduction equation
S. P. POPOV	469	Examples of numerical solutions of the stable Kadomtsev-Petviashvili equation with sources
A. I. TOLSTYKH and D. A. SHIROBOKOV	477	Difference schemes with compact fifth-order approximations for spatial flows of a viscous gas
I. A. VASIN	491	The inverse problem of selecting a linearization coefficient for the Navier-Stokes equations with integral overdetermination
S. S. MAKHANOV and A. YU. SEMENOV	501	A two-dimensional non-negative algorithm for calculating the flow of a liquid in an open channel
V. A. VSHIVKOV	509	The approximation properties of the particles-in-cells method
V. V. ARISTOV, F. G. CHEREMISIN and I. N. SHISHKOVA	517	Unsteady reflection of a shock from a wedge for the Boltzmann equation
L. A. BAZYMA and V. I. KHOLYAVKO	525	A modification of Godunov's finite difference scheme on a mobile grid
G. K. KAMENEV	533	An algorithm for approximating polyhedra
K. G. SABIRYANOVA	545	An additive optimum covering problem
YU. A. KRIKSI	553	Constructing conservative difference schemes for problems of classical mechanics

VOL. 36, NO. 5

1996

L. F. YUKHNO	555	An eigenvalue property of the product of two rectangular matrices
F. P. VASIL'YEV, A. NEDIĆ and M. YACHIMOVICH	559	A two-step regularized method of linearization for solving minimization problems
A. F. IZMAILOV	569	Higher-order methods for finding irregular solutions of non-linear operator equations
A. G. KOROTCHENKO	577	An approximately optimal algorithm for finding an extremum for a certain class of functions
I. V. KONNOV	585	A general approach to finding stationary points and the solution of related problems
E. N. GORDEYEV	595	The method of non-uniform coverings for a special form of discrete optimization
M. M. SMIRNOV	605	The logical convolution of the criterion vector in the problem of approximating a Pareto set
A. S. AVDEYEV and A. B. VASIL'YEVA	615	A step-type contrasting structure for a system of two singularly perturbed second-order equations
V. YE. VOLKOV	627	Asymptotically fast approximate methods of solving Laplace's difference equation in a cube
YU. I. MOKIN	633	A special method for computing the matrices of difference schemes for one-dimensional integral equations
J. AHNER, V. V. DYAKIN and V. YA. RAYEVSKII	643	Eigenvectors of the magnetostatic operator for a spheroid

V. P. ORLOV	649 Non-local solvability of a one-dimensional mathematical model of viscoelasticity
O. A. DREMOV, A. KH. PERGAMENT, YU. A. POVESHCHENKO and YE. A. SAMARSKAYA	659 A method of modelling the development of sedimentary basins
G. G. MALINETSII and M. YE. STEPANTSOV	669 Cellular automata for some gas dynamic processes
V. P. KOZYREV	677 The description and generation of all minimal colourings of an interval graph and the solution of associated problems
S. I. DUDOV	683 An inner bound of a convex set by a norm body
	689 Corrigendum

VOL. 36, NO. 6

1996

YE. YE. TYRTYSHNIKOV	691 Parallel methods for generalized Toeplitz systems
KH. D. IKRAMOV and V. N. CHUGUNOV	703 Rational solvability of the inverse Silva problem
YE. F. GALBA	709 Iterative methods for calculating a weighted pseudoinverse
O. N. NOVOSELOV and A. F. FOMIN	719 The efficiency of discrete sine and cosine transforms of random sequences
V. P. GERGEL	729 A method of using derivatives in the minimization of multiextremum functions
V. F. BUTUZOV and YE. A. DERKUNOVA	743 Asymptotic form of the solution of the heat conduction equation with a non-linear heat source in a thin rod
A. YU. SHCHEGLOV	759 The monotonicity of the solution of the mixed problem for the quasilinear heat-conduction equation with a discontinuous coefficient
S. I. SOLOV'YEV	767 The uniqueness of the solution of the inverse problem for the stationary heat equation
I. O. ARUSHANYAN	773 Numerical solution of boundary integral equations of the second kind in domains with corners
V. V. TERNOVSKII and A. M. KHAPAYEV	783 Statement and solution of a problem of the theory of non-linear oscillations
N. V. MUZYLEV	791 The uniqueness of the solution of an inverse problem of non-equilibrium sorption dynamics
YU. S. KOSOLAPOV and A. S. LIBERZON	805 An implicit relaxation method for calculating steady two-dimensional flows of a spontaneously condensing vapour
N. S. VASIL'YEV	817 A parallel algorithm and computer architecture for calculating an inertia matrix
YU. G. BULYCHEV and I. V. BURLAI	823 The differentiation of functions with a finite spectrum on a non-uniform interpolation grid

VOL. 36, NO. 7

1996

A. GEORGE and KH. D. IKRAMOV	825 Hankel matrices commuting with tridiagonal matrices
V. N. KUBLANOVSKAYA	831 The estimation of irremovable errors
A. F. IZMAILOV and A. A. TRET'YAKOV	835 Local regularization of certain classes of non-linear operator equations
YU. G. YEVTUSHENKO and V. G. ZHADAN	847 Dual barrier-projection and barrier-Newton methods for linear programming

D. VASILE and A. V. GULIN	861 A difference eigenvalue problem
D. YU. IVANOV and R. P. TARASOV	869 Numerical solution of integral equations with a one-parameter symmetry semi-group
R. R. GADYL'SHIN	889 Perturbation of the Laplacian spectrum when there is a change in the type of boundary condition on a small part of the boundary
I. D. TURETAYEV	899 An investigation of finite difference schemes for the modified Korteweg-de Vries equation
P. G. AKISHIN, I. V. PUZYIN and YU. S. SMIRNOV	915 A method for the numerical solution of three-dimensional polaron equations
V. L. KAMSKII, YU. V. MEDVEDEV and V. S. FILINOV	923 The method of stochastic dynamics in the Wigner formulation of quantum mechanics
A. YE. POYEDINCHUK, YU. A. TUCHKIN and V. P. SHESTOPALOV	935 Wave diffraction in a locally heterogeneous medium
V. B. KARAMYSEV, V. M. KOVENYA, S. G. CHERNYI and P. A. SHASHKIN	947 A method of accelerating the convergence of the method of global iterations for solving simplified Navier-Stokes equations
V. A. TUPCHIEV	957 The global solvability of Cauchy's problem for a system of gas-dynamics equations describing barotropic spatial flow
D. BAHLMANN and V. G. KORNEYEV	969 A fast solver for the clamped plate problem in a rectangle based on a boundary potentials method

VOL. 36, NO. 8

1996

V. N. KUBLANOVSKAYA and V. B. KHAZANOV	983 Relative factorization of polynomials of several variables
KH. D. IKRAMOV	989 A method of recognizing a regular eigenvalue
S. G. SOLODKII	991 The discretization of ill-posed problems
A. V. VOITISHEK	997 Discrete-stochastic procedures for the global estimation of an integral which depends on a parameter
V. M. RYABOV	1011 Quadrature formulae for evaluating singular integrals of oscillating functions
A. A. ABRAMOV and A. A. ASLANYAN	1017 On a singular boundary-value problem for linear Hamiltonian systems of ordinary differential equations
M. K. KERIMOV	1027 Special functions which occur in the theory of non-linear oscillations
G. YU. KULIKOV	1041 Convergence theorems for iterative Runge-Kutta methods with a constant integration step
S. I. SERDYUKOVA	1055 A CAS REDUCE investigation of the stability of Rusanov's scheme with conditions at domain joints
V. B. ANDREYEV and N. V. KOPTOVA	1065 A study of difference schemes with the first derivative approximated by a central difference ratio
A. V. GULIN and L. F. YUKHNO	1079 Numerical investigation of the stability of two-layer difference schemes for the two-dimensional heat-conduction equation
P. A. KRUTITSKII	1087 The mixed problem for the Helmholtz equation in a multiply connected region
A. B. SAMOKHIN and A. S. SAMOKHINA	1097 A method of solving problems of the diffraction of electromagnetic waves by a three-dimensional dielectric solid
A. I. BORODIN, V. A. IVANOV and S. V. PEIGIN	1113 Numerical investigation of supersonic flow around blunt bodies in the model of a viscous shock layer
YE. M. SHAKHOV	1123 The axisymmetric non-linear steady flow of a rarefied gas in a pipe of circular cross-section

P. K. VOLKOV	1133	Calculation of local characteristics of a liquid with gas bubbles
A. G. KUZ'MIN	1145	The interaction of a shock wave with a sonic line
M. A. NAIDA and A. S. FONAREV	1153	A modification of the method of alternating directions for calculating axisymmetric unsteady transonic flows
YE. V. DYUKOVA, YU. I. ZHURAVLEV and K. V. RUDAKOV	1161	Algebraic-logic synthesis of correct recognition procedures based on elementary algorithms

VOL. 36, NO. 9

1996

A. B. BAKUSHINSKII	1169	Linear approximation of the solutions of non-linear operator equations
V. A. MOROZOV	1175	Regularization when there is considerable interference
A. F. IZMAILOV	1183	Stable methods for finding 2-regular solutions of non-linear operator equations
A. S. LEONOV	1193	Functions of several variables with bounded variation in ill-posed problems
A. S. TIKHONOV	1205	Mixed global and local search methods as optimization algorithms
N. S. ALEKSEYEV	1213	Algorithms for the multicriterial comparison of versions of the solution where the criteria are ranked in importance
L. N. SHABLITSKAYA	1223	The solution of Cauchy's problem for a system of second-order linear differential equations, unsolvable for the highest derivative
G. I. SHISHKIN	1233	Approximation of the solutions and diffusion flows of singularly perturbed boundary-value problems with discontinuous initial conditions
A. B. VASIL'YEVA, N. N. NEFEDOV and I. V. RADCHENKO	1251	An internal transition layer in a singularly perturbed initial-value problem
M. B. TVERSKOI	1257	Non-linear waves in a stratified liquid which are independent of the vertical coordinate
P. V. PLOTNIKOV and L. V. SHURSHALOV	1265	Radiation effects in the intense interaction of a cloud of interplanetary dust and the earth's atmosphere
V. V. NEGODA and K. G. SAYADYAN	1277	The use of transonic slender-body theory to calculate the spatial flow over a wing-fuselage configuration
A. P. MALYSHEV	1295	A monotone difference scheme of increased accuracy for the computer simulation of wave processes
A. N. KRAIKO and N. I. TILLYAYEVA	1299	The method of characteristics and semi-characteristic variables in problems of profiling supersonic parts of axisymmetric and plane nozzles
B. D. ANNIN and V. M. SADOVSKII	1313	The numerical realization of a variational inequality in the dynamics of elastoplastic bodies

VOL. 36, NO. 10

1996

M. V. NOSKOV and A. R. SEMENOVA	1325	Cubature formulae of high trigonometric accuracy for periodic functions of four variables
N. D. MOROZKIN	1331	The convergence of finite-dimensional approximations in the problem of the optimal one-dimensional heating taking phase constraints into account
I. I. MELAMED and I. KH. SIGAL	1341	A computational investigation of linear parametricization of criteria in multicriteria discrete programming
N. A. MELLER, B. V. PAL'TSEV and I. I. CHECHEL'	1345	A rapidly convergent iterative domain-decomposition method for boundary-value problems for a second-order elliptic equation with a parameter

N. A. STRELKOV	1359	Cross-type projection-grid analogues of the Laplace operator
I. V. DENISOV	1367	A boundary-value problem for a quasilinear singularly perturbed parabolic equation in a rectangle
A. L. GLADKOV	1381	Unbounded solutions of the non-linear heat-conduction equation with strong convection at infinity
G. P. ASTRAKHANTSEV	1393	The decomposition method for solving elliptic problems in a three-dimensional domain
S. V. BOGATYREV	1401	Slow motions in the combustion problem in the case of an autocatalytic reaction
A. A. ABRAMOV, A. YE. MIKHINOV and V. I. UL'YANOV	1407	The instability of longshore currents in the breaker zone
A. A. AMOSOV and A. A. ZLOTNIK	1415	An estimate of the error of quasi-averaging of the equations of motion of a viscous barotropic medium with rapidly oscillating data
M. A. GIL'MAN, A. G. MIKHEYEV and T. L. TKACHENKO	1429	The two-scale model and other methods for the approximate solution of the problem of diffraction by rough surfaces
V. V. OSTAPENKO	1443	A method of increasing the order of the weak approximation of the laws of conservation on discontinuous solutions
D. V. SADIN	1453	A modified large-particle method for calculating unsteady gas flows in a porous medium
S. A. VELICHKO, N. A. VLADIMIROVA, YU. B. LIFSHITS, I. A. SOLNTSEV and A. M. SOROKIN	1459	The influence of permeable boundaries on transonic flow past an airfoil
A. B. AL'SHIN, YU. D. PLETNER and A. G. SVESHNIKOV	1471	The solvability of one external initial and boundary-value problem for the ion-acoustic wave equation
V. G. IMEDASHVILI and E. N. POTETYUNKO	1479	A variational approach to the construction of the asymptotic form in the problem of the harmonic oscillations of a liquid

L. A. KNIZHNERMAN	1481	The simple Lanczos procedure: estimates of the error of the Gauss quadrature formula and their applications
V. P. GERDT, V. N. ROBUK and V. M. SEVER'YANOV	1493	The construction of finitely represented Lie algebras
N. L. ZMATRAKOV	1507	Approximation by local two-dimensional splines of smoothness C
R. P. TARASOV	1515	Numerical inversion of integral Wiener-Hopf operators with a causative operator kernel in multidimensional inverse problems of unsteady heat conduction
T. K. MELIKOV	1541	An analogue of Pontryagin's maximum principle in systems with neutral-type delay
M. K. KERIMOV	1547	On certain special functions that arise in the solution of ordinary differential equations by asymptotic methods
A. A. ASLANYAN	1567	The investigation of certain properties of the self-conjugate eigenvalue problem
I. A. SAVIN	1573	The rate of convergence on a piecewise-uniform grid of a difference scheme for the parabolic equation
B. M. PALATNIK and V. I. PISKAREV	1581	The use of a high-accuracy numerical scheme to model two-phase flow through a porous medium
A. M. DENISOV and A. A. POPOV	1591	Two-dimensional Doppler tomography

O. A. VYACHKILEV, N. B. IL'INSKII, G. R. ISMAGILOVA, A. V. POTASHEV and YE. V. POTASHEVA	1599	The inverse boundary-value problem for a turbine cascade situated on an axisymmetric stream surface in a layer of variable thickness
B. V. PAVLOV and O. YE. RODIONOVA	1607	An averaging technique for the discretization of the kinetic integro-differential equation
K. V. POPOV and A. V. TIKHONRAVOV	1625	New uniqueness classes for determining the parameters of a stratified medium from its energy reflectance
A. YU. SEMENOV	1635	A method of calculating the non-linear filtration equation for which the solution satisfies bilateral estimates

VOL. 36, NO. 12

1996

B. I. KVASOV	1637	Algorithms of isogeometric approximation by generalized cubic splines
V. F. SNIGIREV	1655	A non-classical version of the boundary conditions for a cubic vector spline
M. L. GRIGOR'YEVA and YE. I. OSTROVSKII	1661	Computing integrals of discontinuous functions by the method of dependent tests
N. S. VASIL'YEV	1671	The search for a fixed point of a consistently monotone mapping
V. G. MALINOV	1679	Four-parameter two-step projection minimization methods
V. B. ANDREYEV and I. A. SAVIN	1687	The computation of boundary flow with uniform accuracy with respect to a small parameter
I. V. DENISOV	1693	An estimate of the residual term in the asymptotic form of the solution of a boundary-value problem
V. K. SAUL'YEV*	1697	A difference method for solving parabolic equations of any order
N. S. BAKHVALOV, G. P. PANASENKO and M. E. EGLIT	1701	The effective properties of structures and composites with inclusions in the form of walls and rods
S. A. VELICHKO, YU. B. LIFSHTIS, V. M. NEILAND and I. A. SOLNTSEV	1707	Correction for the influence of the walls of a transonic wind tunnel
I. V. YEGOROV and D. V. IVANOV	1717	The use of fully implicit monotone schemes to model plane internal flows
YU. V. ZAIKA	1731	The solvability of the equations for a model of gas transfer through membranes with dynamic boundary conditions
A. V. SHCHEPROV	1743	Calculation of the electron distribution function of a semiconductor plasma in an electric field
I. N. LARINA and V. A. RYKOV	1755	Calculation of plane flows of a rarefied gas at low Knudsen numbers
I. V. SAVENKOV	1769	The development of wave packets in a boundary layer on a bumpy surface
YU. G. YEVTUSHENKO and V. G. ZHADAN	1777	Concerning some publications on internal point methods
